PROJECTS

Pomodoro Timer Chrome Extension

07/2023

<https://pomodorotimerproductive.netlify.app>

Developed a Pomodoro Timer Chrome extension with customizable intervals and a long break feature to improve user productivity and time management.

- Developed a Pomodoro timer using **JavaScript**
- Helps users track elapsed time with a progress bar and alerts them when the time runs out through notifications and an alarm.
- Sends voice messages to encourage users to return to work after their break.
- Learned to develop and publish an extension in the Chrome WebStore.

Google for Recipes

08/2023

<https://github.com/raufahamed/Google-for-Recipe>

Built a Recipe Search Platform for enable users to **search across a database of 2 million recipes** by dish name, ingredients, cuisine, and dietary preferences.

- Developed a web app forend-to-end recipe discovery and content consumption using React.Js and the FetchAPI.
- Leveraged the EdamamAPI Library to fetch recipe information based on searchqueries.
- Proficient in making API calls, parsing JSON data, and effectively utilizing API end points to retrieve and display recipe information

LOS POLLOS FASHIONS

08/2023

<https://lospollosfashions.netlify.app/>

Developed a fashion website with **HTML, CSS, and JavaScript**, enabling users to view product details, add items to their cart, and proceed with checkouts.

- Utilized HTML, CSS, and JavaScript to develop an engaging and attractive **user interface**.
- Implemented responsive design principles for seamless user experiences across devices
- Gained knowledge in developing a dynamic website.
