## SUMMARY

As a Software Developer with real-world experience, I specialize in building web applications and delivering effective software solutions. I excel at solving complex problems and collaborating with teams to create high-quality, impactful software. Driven by a passion for continuous learning, I am eager to explore new technologies and refine my skills. I seek opportunities to contribute to meaningful projects and be part of an innovative team.

## EXPERIENCE

### Software Engineer

#### Midpath Software Pvt Ltd

05/2024 - 08/2024 Remote, India

- FlipLine** is a tool to help you record what happens on websites that you build and maintain.
- Designed and implemented user interfaces for multiple pages; integrated CrispChat for enhanced customer support, and added various features to improve functionality.
- Implemented Google Sign-In functionality and created corresponding signals for user authentication.
- Enabled conversion of recordings to Playwright scripts for automated testing.
- Created user documentation, managed email invitations, and set up a Docker container for automated Postgres backups to S3.
- Worked on Y-Ultimate**, an organization that empowers underprivileged children through Ultimate Frisbee by teaching life skills.
- Developed a dynamic image carousel and a "Newsletters" page to enhance user engagement.
- Enhanced and maintained the Django admin interface by adding actions and functionalities, including data export to Excel, file storage in Amazon S3, and data copying to Google Sheets, streamlining content management.
- Worked on Adhyaya Fellowship applications**, focusing on supporting and streamlining the application process for prospective fellows.
- Enhanced and maintained the Django admin interface, including the creation of new functionalities, automated database backup commands (with old backups deletion), and form validation for user data storage. Made UI improvements to home pages and forms.
- Utilized Amazon S3 for file and data storage, assisted in migrating a WordPress site to our platform, and created reports in Looker Studio for application tracking.

### Full Stack Developer Intern

#### Midpath Software Pvt Ltd

02/2024 - 05/2024 Remote, India

- Designed and developed responsive UI pages for various projects, enhancing user experience and visual appeal with clean, intuitive interfaces that align with project goals.
- Converted WordPress designs into custom code using Tailwind CSS, improving performance and design flexibility while adhering to brand standards.
- Enhanced Django admin pages to improve functionality and user experience, streamlining workflows for better data management.

## EDUCATION

### B.SC. Computer Science

#### AVS College of Arts and Science

2020 - 2023 Salem, TamilNadu

### State Board (HSC)

#### Ramakrishna Saradha Higher Secondary School

2019 - 2020 Salem, TamilNadu

## SKILLS

JavaScript

TypeScript

React.js

Next.js

Python

Django

Tailwind CSS

CSS

Html

Git/Github

Docker

## PROJECTS

### Code Snippets - Next.js

<https://github.com/raufahamed/Code-Snippets-Next.js>

Built Code Snippets with Next.js, enabling users to easily create, edit, and organize code snippets

- Utilized **Manoeditor** for simplified code editing within the application
- Implemented **cache** methods in Next.js to optimize performance and ensure real-time updates for code snippets.
- Leveraged **Prisma** for database operations, ensuring efficient storage and retrieval of code snippets

### Discussion Dev - Next.js

<https://github.com/raufahamed/Disucssion-dev>

Discussion Dev is a web platform where developers can post questions and engage in discussions on various topics.

- Integrated **NextAuth** with GitHub for secure user authentication.
- Implemented form validation using **Zod** and leveraged Next.js **cache** methods for optimized data fetching and dynamic content updates
- Utilized **Prisma** for database management, enabling key features such as post creation, comments, and topic pages.
- Developed engagement features including discussion creation, comment replies, and topic filtering for enhanced user interaction.

### Pomodoro Timer Chrome Extension

<https://pomodorotimerproductive.netlify.app/>

Developed a Pomodoro Timer Chrome extension with customizable intervals and a long break feature to improve user productivity and time management

- Developed a Pomodoro timer using JavaScript
- Helps users track elapsed time with a progress bar and alerts them when the time runs out through notifications and an alarm
- Sends voice messages to encourage users to return to work after their break
